Carol Fleskes, Manager
Hazardous Waste Investigation and Cleanup Program
Washington Department of Ecology PV-11
4415 Woodview Drive S.E.
Lacey, Washington 98503

Dear Carol:

Based on your conversation with Bob Kievit, it is my understanding that Ecology is scheduled to take the following actions at the Pasco Sanitary Landfill and at Old Inland Pit:

Old Inland Pit:

Conduct studies needed to rank the site under Model Toxics Control Act (MTCA), including an on-site sampling investigation within six months.

Pasco Sanitary Landfill:

- 1) Conduct a PLP search in the first quarter of state FY91;
- 2) Begin negotiations with PLPs during the second quarter of state FY91;
- 3) Consent decree or order with PLPs for RI/FS signed by the fourth quarter of state FY91.

If any of the above is not correct, please let me know.

Sincerely,

Phil Milam, Chief
Superfund Branch
